

To whom it may concern,

I am very happy to recommend Golding Projects and Terry Golding specifically.

Our building requirement was a bit unusual in that we wanted an extension to our existing building, built to lockup but allowing us to complete the interior. Terry was happy to undertake this work for us.

Terry was at all times very professional yet approachable, providing us with a detailed quote and walking us through the whole process. All the people involved in the process, from beginning to end were friendly, efficient and easy to talk to. Trades people turned up when we were told they would, were polite and respectful, and happily explained what their role was.

As we were able to use a vacant block adjacent the building area, Terry was required to liaise with the owner and ensure that the block was left as it was when work commenced. Our property and the neighbouring block were left very clean and tidy, and the work was completed as requested.

Considering the work involved, the process was painless with minimum disruption and we were extremely happy with the final result. The work was completed ahead of schedule and on budget. I would be very happy to and most likely will have Terry undertake further work in the future.

I would be happy to discuss my experiences further or show the work done by Golding Projects.

Warm regards

Anne-Marie
