

## Re: Recommendation for GOLDING PROJECTS

We purchased a 1960s home and wanted to transform it to incorporate modern living while still maintaining typical characteristics of the era. We had never renovated or built a home before, and were seeking a builder who was reliable and trustworthy. After our initial meeting with Terry, we felt an instant rapport; we had found a builder who understood our needs, and we looked forward to working with him.

Terry and his team displayed a high level of professionalism and reliability throughout the renovation process. Terry provided a team of tradesmen who were dedicated, punctual and their workmanship was to a very high standard.

Terry was always easily contactable and provided regular updates on the project. The renovation was completed within the contract time frame.

We have no hesitation in engaging Golding Projects in any future projects and would like to thank Terry and his team for providing a renovation process that was stress-free, making it a pleasurable experience.
