

Quite simply....Terry was a dream to work with, from the planning stage to completion. We were constantly involved in the project and every detail was explained at length.

Terry had come strongly recommended from my younger brother who had an extension just completed and now Terry is just about to start on the third family member's property.

I operated my office from home through out the whole building process and was not any any stage inconvenienced.

We are both ecstatic with the look and finish of our home and would say to anyone unsure where to begin and which builder to use....Call Terry!
