

To Whom It May Concern

**LINEAR
ARCHITECTS**

I write to you to concerning Mr Terry Golding.

Terry has worked with me for a number of years and has always been not only reliable and hard working but also one who understood the complexities involved in the building process with the construction of both single and two storey dwellings.

In addition he was able to anticipate many of the potential problems that arise when using a number of dissimilar materials in sometimes unique situations. In a supervisory capacity Terry is quite capable of finding solutions to the problems often faced on a building site.

More importantly, Terry has no concerns about seeking assistance when he feels that the project may benefit from an alternate point of view or further exploration of a variety of solutions.

I have no concerns commending Terry to you.
