

Terry ... We are immensely grateful for the energy and enthusiasm that you and your trusted crew have put into creating our dream home.

From the very beginning our decision to renovate and then choosing you and Golding Projects to be 'the' builder has been two of the best decisions we have made.

You have transformed a 1910 Queen Anne Villa which had lost some of its appeal over the years. It is now restored to its glory complete with a contemporary extension, we have retained the history of our home yet created a modern edge with modern comforts!

It is testimony to you that you have the ability to win the project and then surround yourself with great people. You have the skills to sequence the work, add value to what is required and when you have to pull a favor.

We have really enjoyed meeting all the tradesman who have done the work professionally and have found ways to contribute extra value to the build.

Thank You ... Steve and Deb Wise
