Subject: testimonial (at last!)

Dear Ben and Terry,

I wanted to thank you both sincerely for building my dream home. Its such a cliché, but very apt. Its been my dream for a long time and you both helped to bring it to fruition. Without you, it would literally not have been built, as you were the only builder brave enough to attempt to build something quite different, i.e., a strawbale house and for that alone, I am eternally grateful. As a bonus, you appreciated the need for a sustainable approach to the design of houses.

I particularly appreciate the fact that you both have always been available to me, both before the build even commenced, all the way through and beyond. That was particularly reassuring as I was a first time 'builder'. Your friendly, approachable, knowledgeable, and patient attitude got me through the process with very little distress, in fact, I quite enjoyed it

Some other things I appreciated were cleanliness on site, being courteous to the neighbours, and finally getting the build finished on time.

I wish you every good fortune in the future, keep up the good work and have a very happy, relaxing Christmas. It would be my pleasure to be a source of future reference for your company should you require it.

Yours sincerely,

Deborah Worthley,
proud owner of the first strawbale house in Leabrook.
